Website Coordinator: As you are aware, our website has been redesigned. Several new components have been added including... Maps to meetings, forum where people can submit comments, ask questions, & view area activities, a page to access information about NA locally & around the world. Traffic on our website averages between 70 to 80 visitors per day, around 2,000 visitors per month. Most people are looking @ the activities & meetings pages. This traffic is being generated by Google which is directing people to our website when they are searching for Na related information. Some of the traffic is also being generated because other websites are linked to ours. That is, they have added a link on their on their website that directs them to ours. There has been significant increase in these type links on within the last couple of months. Some of these are public information websites, including governmental. I suspect most of this may be due to an increase in the reliability & timelines of the information we are presenting. The basic design & implementation of our website is complete & stable. The most urgent issues have been addressed. We can begin adding extra information which I would like to bring up during our open discussion in this meeting. Remember, you can always submit comments & suggestions through the Forum page on the website. It is an excellent resource for communication between all OASC members between business meetings because comments & suggestions will be posted the same day they are submitted (after review of course). Just go to the Forum page & click on the 'Post or view comments to the Webmaster...'link. As soon as I see the comment has been posted & verified the content adheres to our traditions, I'll approve the comment & it will show up on that page of the website. I would like to thank everyone for their patience while the website was being updated & for their input in the design. Nobody does this kind of stuff alone. They only think they do. In Loving service, Tom H.
